

## CHRIS HENWOOD

Chris joined the AGWA Master Glazier program in 2018 and founded Façade Site Services in Perth, Western Australia, in 2020. The project Chris has chosen to highlight is the refurbishment of a building in Perth. He explains the project as follows:

'The project involved the refurbishment of a 13-storey building both inside and out, including the installation of skylight glass in the main void. The span covered six levels with a five panel skylight, each weighing 1400 kg. Another part of the refurbishment was the installation of a unique unitised curtain wall with over 130 different panel types. United Crane Services 220 t Demag helped install the last level.

'Part of what I did was provide water testing with a full report together with photos and explanations. These were all compliant with AAMA 501.2 Standards. I also project managed an acoustic-rated internal partition suite with curved corners and slim line features, which gives an inviting feel when entering the floors.

'On this project I worked with Façade Management Australia - Design and Construct. The building is due to be completed by the end of 2021.

'For the last 10 months, I have been involved in managing the installation on a project which consists of the curtain wall installation, skylight glass installation, internal partition installation, glass canopy, perforated screen installation and balustrade installation. On this project, I worked with Façade Management Australia - Design and Construct. The building is due to be completed in early 2022.

'All of these aspects of the project have been challenging in some way, but I am proud to have been co-managing such a unique and varied project.'

If you would like to find out more about aspects of this project, please contact Chris Henwood on 0423 460 709 or at [chris@facadesiteservices.com.au](mailto:chris@facadesiteservices.com.au)
