

## DEAN MURTAGH

Dean joined the AGWA Master Glazier program in 2017 and is employed at Bellvue Windows in Moorabbin, Victoria. The project Dean has chosen to highlight is the renovation of a residential home in St Kilda and he explains it as follows:

The project was the beautiful design of a residential home in Robe Street, St Kilda, which we completed in January 2021.

The home had a combination of Alspec commercial sliding doors with sub sill and sub head and Euro lift and slide doors. Euro commercial thermal break windows were used for the curved and raked windows and bay windows. We also had sashless windows. We had large floor to ceiling windows and the curved IGU panels went in very smoothly. All the windows were designed to be minimal view, so the glass was more of the featured look.

All the materials were supplied by Element Windows. We fabricated part of it and installed the entire job. We had to fabricate part of the job onsite, as some of the windows were too large to transport.

The whole of the job, from fabricating to installing went very smoothly and I didn't come across any challenges. The best part of the job was the fitting of the curved windows. I was most impressed with the size and curves how it all flowed together. The clients loved the finished product.

If you would like to know more about this project or the products used, please contact Dean Murtagh at Bellvue Windows.

# CONGRATULATIONS

## New and Renewing Master Glaziers

November - January 2021

Mark Dodd (Penguin Facades); Russell van der Mey (Penguin Facades); Mark Moscou (Penguin Facades); Mark Benveniste (Construction Glazing); Jerome Semmler (Barossa Glass).

## New and Renewing Certified Glaziers

November - January 2021

Alex Webster (CWD Custom Windows); Colin Cawood (Hartley Glass).
